

# WAVE SCORES: EPIC

## WHAT IS A WAVE SCORE

When you play The Guide on MemoryBeach, you receive a **Wave** score. When people score like you did, they find they can remember certain things better than others. How you remember determines your **Wave**.

## EPIC WAVE

Those who find themselves in the Epic Wave group seek out activities with **more than 4 steps** and can quickly remember those sequences. Because these products or activities put big demands on your memory, they typically require a lot of practice using them, or practice in similar activities.

Epic *Waves* are truly challenging. These products require a great deal of practice to effectively use them or set them up.

Products in our [Epic Wave](#) category on [MemoryBeach](#) are perfect for someone who enjoys challenges. These products are great reminder tools. Setting them up requires someone who likes to follow directions, figure things out, and problem solve.

For example, they might be good at looking at a complex set of directions, categorizing them quickly, and then taking on a new activity.

People in the Epic Wave are good at figuring out and fixing things, addressing complex problems as they surface, and finding their ways around new locations or forms of transportation.

For Epic *Wave* products, our LifeGuards are on hand to help explain how they work.

# WAVE SYMBOLS

## Light

These products have certain features that make **them easy to remember between uses.**

Example: Writing in a journal every day and remembering where your pen and journal are, and what you'd like to write about.

## Exciting

These products require more effort, for more **payoff!** Example: Learning how to make a favorite meal and remembering how to improve it.

WAVE LEVEL

## Epic

These products need **set up, passwords, or other support.** Example: Setting up a home security system, solving complex financial problems, planning a trip involving medication management.

VACATION

## Vacation

No matter what *Wave* interests you, the **Vacation Wave is always easy.** Example: Remembering where you put your keys, by hanging them up in the same place by the door every time.

### Wave Score Defined

A MemoryBeach Wave Score helps you figure out how your memory works, and to connect that Wave Category to products, services, and other solutions best matched to your current memory skills.

# WAVE SCORE PRODUCT MENU

## EXAMPLES OF PRODUCTS BY WAVE SCORE

Those who score in a Wave Category may find those products matched to their memory systems the easiest to remember how to use. A few examples are below.

### LIGHT WAVE

Reliable phone & lighting devices that keep these essential devices charged with built-in back ups if you're not near power.

Using electronic key & small item location systems.

### EXCITING WAVE

Playing card games with special, relevant designs to encourage playing, which reinforces card game rules to remember.

Setting up and maintaining pill reminder systems for home and travel.

### EPIC WAVE

Setting up a smart home devices such as security systems, or a Google Home, Amazon Alexa, or similar Internet-Of-Things device, and connecting that device with your home Internet provider and securing your account.

### VACATION WAVE

Backpacks with special protecting pockets that "remind" you where to put valuable items (to avoid credit card swiping theft).

Drinking cups made from silicone that collapse, with handy pill compartments built into them!
